TESA μ -HITE

The μ ltra compact turnkey solution for the product line

Need a "turnkey solution"?

With its application range of 100 mm, this measuring station for workshops and laboratories is particularly suitable for measuring small parts.

Installed quickly, its high accuracy (1 μ m) not only matches the most powerful height gages, but also 1D probes, which are often expensive to install and less flexible in terms of application.

**HIGH
ACCURACY**
